

EDUGROUP Invited to Participate in AI Education Seminar Series and Application Exhibition

Supporting Schools in Advancing AI Teaching Pathways and Practical Implementation

(Hong Kong, 2026.2.5) – EDUGROUP was invited to participate in the “Artificial Intelligence Education Seminar Series and Application Exhibition,” which brought together education stakeholders to explore the latest developments in AI-enabled learning solutions.

The event focused on sharing current policy directions, forward-looking technology solutions, and practical implementation experience in AI education. A range of AI learning applications and teaching tools were showcased, demonstrating how artificial intelligence can be integrated into teaching, learning, and school development in a structured and sustainable manner.

Through professional exchange and on-site demonstrations, the exhibition supported schools and educators in planning future AI teaching roadmaps, as well as in understanding how to effectively leverage available resources, including Smart Learning funding and the Quality Education Fund (QEF), to support innovation in education.

EDUGROUP’s participation reflects its ongoing commitment to supporting the education sector in translating emerging technologies into practical teaching strategies and long-term development planning.
