

EDU Group Participates in AI Innovation Experience Event,

Exploring Artificial Intelligence Through Education and Industry Collaboration

EDU Group recently participated in an AI-focused innovation and workplace experience event jointly organised by the Hong Kong Productivity Council (HKPC) and UBTECH Education. The event brought together participants from the education and technology sectors to explore the application of artificial intelligence in learning environments and professional settings.

During the event, EDU Group engaged in interactive sessions and experience-based activities related to AI technologies, workplace skills, and career development. The event provided a platform for participants to gain exposure to emerging technologies and better understand their role in future work and education landscapes.

EDU Group values opportunities to support initiatives that bridge education, technology, and real-world applications. Participation in the event reflects the Group's ongoing interest in innovation, professional development, and responsible technology engagement.

Looking ahead, EDU Group will continue to take part in cross-sector activities that encourage learning, exploration, and sustainable development across education and industry.
