

EDU Group Students Complete WRC Guangdong Selection Event in Shenzhen, Achieving Encouraging Results in Youth Robotics

Supporting Young Learners Through AI and Robotics Competition Experience

EDU Group recently took part in the WRC 2026 Guangdong Selection Event in Shenzhen, where participating students completed two days of robotics competition from 18 to 19 July 2026.

The event provided students with a valuable opportunity to engage in robotics learning, competition practice, and hands-on problem solving. Through the competition process, students were able to apply their knowledge in AI and robotics while gaining experience in a more challenging and practical environment.

A particularly encouraging result came from EDU Group's Hong Kong-related school team, which achieved a top-three result in the primary school group. The outcome reflected the efforts of the participating students, as well as the continued guidance and follow-up provided by EDU Group's training instructors throughout the preparation process.

Although Hong Kong students are still developing competition experience in AI and robotics, the result demonstrated strong potential and meaningful progress. The event also highlighted the importance of providing students with more opportunities to participate in regional and national-level robotics competitions.

EDU Group values opportunities to support young learners in exploring artificial intelligence, robotics, and technology-related learning. Looking ahead, the Group will continue to follow students' progress and support their participation in practical learning experiences that strengthen confidence, technical ability, and innovation awareness.

Date: 18–19 July 2026

Location: Shenzhen, China
